

**Kiian**

**A1 C10**

Kiian's digital division will show a wide variety of inks, for applications including fashion, sport, interior decoration, contracts and advertising.

**Kornit Digital**

**B1 -175**

Kornit will be showing its market-leading technology for direct-to-garment printing. Its latest introduction is the Kornit Avalanche 951, with 12 print heads (8 x CMYK, 4 x White) for high-volume industrial printing.

**Klieverik**

**Hall A1 – A33**

Klieverik is to present the recently developed Fixation Unit GFC, for dye fixation of

directly printed fabric and for heat-transfer printing on any polyester base fabric. Also in show will be the successful GTC 81 series, for continuous production of direct and transfer dye-sub printing, and the GTC 81/1850 Sport, for continuous transfer printing of precut pieces for sports clothing. Klieverik calenders are available in working with widths from 1650mm to 3200mm.

**Liteks**

**A3 A10**

Liteks Textile, Turkey's biggest fabric-coating company, is to present the Pesent'e Canvas range for digital printing, suitable for both solvent and water-based inks and

**Marabu**  
**A3 D41**  
 Marabu is expanding its digital printing portfolio to include water-based inkjet inks for dye-sublimation printing and will give live demonstrations. The new TexaJet DX-SHE is a hybrid ink for both transfer and direct digital printing on pre-treated polyester, and is optimised for Epson DX4 and DX5 print heads. Marabu says a high-density black ink, coupled with intensive colours, generates high print quality and superb colour gamut. The inks are suitable for all textiles with a minimum polyester content of 60%.

available in different qualities.

**Mehler Texnologies**

**A1 D31**

Mehler Texnologies

manufactures and supplies coated fabrics under the brands Valmex, Polymar and Airtex. It also offers a range of high-strength
