

## New Edition with 294 Brandnew Colours!

The PANTONE® fan is the world's most widely used colour reference system for printing inks. Following the changes from 2010 to 2016, PANTONE® now added 294 new colours to the PANTONE® FORMULA GUIDE colour range.

The new colours are integrated into the colour system. All newly inserted pages are marked in the upper area for easy identification.

With the new PANTONE® Formula Guide, designers profit from the largest variety of inspiring hues available, to support the entire design process: A total of **2161 colour shades!**

The new set of PANTONE® fan decks contains one fan printed on coated, and one fan printed on uncoated paper. Each fan naturally includes the colours that had been added previously.

Please contact your Marabu distribution partner for your new PANTONE® Formula Guide.

### Your Benefits:

**Two fan decks (coated and uncoated paper) with a total of 2161 colour shades**

→ Almost unlimited design possibilities

**294 new, market-driven spot colours**

→ New colour range – new inspiration!

**Colour index at the bottom of the fan**

→ To quickly find the desired shades

**Light evaluation tool**

→ To check whether the current lighting conditions roughly correspond to daylight (D50), providing suitability for the comparison of colours
